

Job Title: Geospatial Developer
Salary: £32,000+
Location: Central London
Role Type: Full-Time Permanent

OVERVIEW:-

Temple is one of the UK's leading independent infrastructure and property consultancies, specialising in environment, planning and sustainability. With a team comprising of some of the most talented people in the industry, we enjoy working on exciting and complex projects, where clients can leverage the full value of our insight and commitment.

Our cutting-edge offer is underpinned by effective use of data and leveraging technology to create innovation and value for money. We are seeking a Senior Geospatial Developer to join our Digital Delivery team to develop solutions for our clients and maintain an efficient internal infrastructure. The role requires someone with creativity and a thirst for innovation, whilst understanding the digital landscape and clients' needs.

The successful candidate will be equally comfortable identifying and presenting solutions to clients, as they are designing and developing the solution. You will work closely with the Digital Delivery team lead and Project Managers within the business to identify opportunities and create web and mobile solutions that maximise the effective use of data for project coordination and delivery.

If you are interested in this role, please send a covering letter to recruitment@templegroup.co.uk, stating your current salary, the role/position/grade you are applying for. Please also attach a copy of your latest full CV.

The Role:-

The Geospatial Developer will report to the Digital Delivery team lead and work closely with all internal teams and potentially with the wider group of companies. They will manage and maintain our Enterprise system and perform web and mobile application development using the ESRI ArcGIS platform. This will include providing support, troubleshooting, making modifications and enhancements, and maintaining existing GIS applications, scripts, tools and web services.

The successful candidate will also be expected to create and maintain system-related documentation. They must be able to demonstrate an ability to work with clients, understand their needs, and translate these into presentable solutions.

Responsibilities will include driving and enhancing Temple's digital offer through identifying and pursuing new opportunities. The successful candidate will have to be comfortable applying their knowledge to new situations and developing their skills to address future challenges and the digital needs of the business.

The Geospatial Developer will be expected to work with, and help out where necessary, the rest of the Digital Delivery Team.

An understanding of, and previous experience working in environment, infrastructure, and/ or built environment disciplines would be considered beneficial to candidates.

The Candidate:-

We expect the successful candidate will:

- have a strong background working with GIS as well as strong commercial experience working as a Geospatial Developer;
- have demonstrable skills in the full stack of ArcGIS Enterprise 10.6 - Data Store, ArcGIS Server, Portal for ArcGIS, and Web Adaptor;
- be experienced in development of web mapping apps using Web AppBuilder;
- be experienced in the development of mobile apps using Collector for ArcGIS and Survey123;
- have experience in installation, configuration, and administration of SQL Server;
- have working knowledge of HTML5, CSS, Javascript, and Python;
- be degree educated.

Experience of any of the following would be useful:

- Workforce for ArcGIS
- C#
- CityEngine
- Unreal or Unity development

Temple provides a wide range of training to its staff including in house workshops run by our experienced team; seminars and presentations from relevant industry professionals in a wide range of environmental, town planning and sustainability disciplines and external project management training.
