Job Title: Graduate Consultant – Acoustics  
Salary: £24,000+  
Location: Central London  
Role Type: Full-Time Permanent

OVERVIEW

Temple is one of the UK's leading independent infrastructure and property consultancies, specialising in environment, planning and sustainability. With a team comprising of some of the most talented people in the industry, we enjoy working on the most exciting and complex projects, where clients can leverage the full value of our insight and commitment.

Our current work portfolio includes: technical support to clients in the private and public sectors, at local and national levels and in the UK and overseas; Environmental Impact Assessments (EIA) and other support for HS2, Crossrail 2, iconic property developments and large regeneration schemes; support to construction activities, including the London Underground Northern Line Extension, HS2 and Thames Tideway Tunnel; a wide range of bespoke planning and environmental assessments – everything from air quality monitoring and Environmental Statement reviews, through to expert witness support in relation to aviation noise.

We are seeking an enthusiastic and dedicated Graduate Consultant to work within our Acoustics team.

If you are interested in this role, please send a covering letter to recruitment@templegroup.co.uk, stating your current salary, the role/position/grade you are applying for. Please also attach a copy of your latest full CV.
The Role:

The Graduate Consultant will report to a senior Acoustics consultant and work closely with other internal teams including our air quality and climate change consultants to deliver projects. Example of projects they will work on might include HS2, Crossrail, Barking Riverside as well as many other medium and smaller sized developments.

The successful candidate will be at home with data analysis and technical writing. They will be able to demonstrate an ability to work with clients, understand their needs, and translate these into presentable solutions.

The Graduate Consultant will provide essential support on projects and to specific business areas. Initial assignments will typically include noise surveys and site visits, data analysis, calculation, modelling and reporting. Within a short period of time, Graduate Consultants are given responsibility for coordinating tasks within projects, drafting reports and liaising with internal and external clients and consultees.

The role will involve a diverse range of work and exposure to some of the highest profile projects in the UK across a range of sectors, including government and policy, transport infrastructure, and property and regeneration.

The Candidate:

We expect the successful candidate will:

- have an Acoustics degree, an Institute of Acoustics (IOA) diploma or have equivalent experience;
- be able to demonstrate an understanding of environmental noise and vibration in the transportation and construction sector;
- have excellent verbal and written communication skills;
- have a strong work ethic and be organised, flexible and motivated; and
- have a proven ability to plan, coordinate and monitor own work.

Knowledge or experience of any of the following would also be useful:

- noise modelling in CadnaA;
- knowledge of scripting in Python;
- advanced knowledge of Excel including working with macros;
- noise or vibration surveys;
- working on construction sites or having a CSCS card;
- being an Associate member of the Institute of Acoustics;
- being able to demonstrate experience of leading projects and working in multi-disciplinary teams to tight deadlines.

Temple provides a wide range of training to its staff including in house workshops run by our experienced team; seminars and presentations from relevant industry professionals in a wide range of environmental, town planning and sustainability disciplines and external project management training.
