

Start a new journey, help shape the future with Temple

Job Title:

Consultant/Senior Consultant –Climate and Carbon

Salary: Negotiable / Competitive

Location: Central London/ Flexible

Role Type: Full-Time Permanent

OVERVIEW

Temple is one of the UK's leading independent environmental consultancies, specialising in environmental assessments, planning, policy advice and sustainability. With a team comprised of some of the most talented people in the industry, we enjoy working on the most exciting and complex projects, where clients can leverage the full value of our insight and commitment.

Our current work portfolio includes Environmental Impact Assessments (EIA) and other support for HS2, Crossrail 2, iconic property developments and developing effective climate change strategies setting a low carbon future that will impact on the lives of many people.

We currently provide expert advice to governments, agencies, companies and major infrastructure projects to help them reduce GHG emissions and adapt to the impacts of unavoidable future climate change. We carry out a wide range of bespoke planning, technical and environmental assessment projects – everything from air quality monitoring, climate change policy analysis, through to expert witness support in relation to aviation noise. We also provide technical support to clients in the private and public sectors, at local and national levels both in the UK and overseas.

Due to our growing portfolio of work we are seeking to add an energetic, enthusiastic and dedicated Senior Consultant/ Consultant to join our Air Quality & Climate Change team. They will take a lead role in the delivery and management of climate change projects, helping to grow our business in this area as well as to further build Temple's market presence.

If you are interested in this role, please send a covering letter to recruitment@templegroup.co.uk, stating your current salary, the role/position/grade you are applying for. Please also attach a copy of your latest full CV.

The Role:

Our Air Quality and Climate Change Team is headed by an experienced Director and comprises Principal, Senior, Consultant and Junior consultants. We are seeking an experienced Consultant /Senior Consultant to further strengthen the climate change capacity and expertise within the team. You will have the opportunity to help shape the future of our work in what is a fast moving, globally important and exciting topic area.

As a valuable member of the team, you will have proven experience in all aspects of consultancy. You will contribute to the development of business area strategy, lead projects and bids and provide support to the development of more junior colleagues.

The role will contribute to existing projects and play a lead role in further developing our portfolio of climate change work in the UK and internationally. The successful candidate will be helping to develop and deliver a strategy for the climate change business area, working alongside the Director and other colleagues. Your expertise, experience, network of contacts and interests will contribute significantly in setting our future strategic direction in this area.

The Duties:

- Work with the Senior Technical Director to provide project delivery in the climate change area and support business development
- Provide technical expertise in one or more of the following fields: climate change mitigation analysis, whole life carbon assessment, circular economy statement, low carbon technologies and energy efficiency, climate change vulnerability and adaptation assessment, greenhouse gas emissions inventories/assessment, emissions trading systems, Monitoring Reporting and Verification (MRV) system development, climate change policy development/analysis, UK/EU/UN climate change legislation and processes.

- Contribute to a wide variety of climate change analysis, advice and capacity building projects.
- Provide oversight on projects within the team including writing, checking and review of deliverables.
- Develop client relationships and support winning new work.
- Undertake bidding work including preparing, contributing to and reviewing bids/tenders.
- Communicate, liaise and collaborate effectively with clients and colleagues.
- Help grow and develop the wider team

Candidates:

Successful candidates will have:

- A passion for the environment and delivering beneficial outcomes.
- Educated to degree level in a relevant field with further degree or professional qualification.
- Specialism in one or more key climate change fields.
- Experience of managing and taking responsibility for delivering successful projects of different sizes.
- Experience of preparing bids, including the development of methodology and presentations.
- Strong networking capability and a well-developed network of contacts.
- Confidence, excellent written and oral communication skills, energy and enthusiasm, and a creative approach to problem solving.

Temple provides a wide range of training to its staff including in house workshops run by our experienced team; seminars and presentations from relevant industry professionals in a wide range of environmental, town planning and sustainability disciplines and external project management training.
